Amplifier built-in extraordinarily small and slim size

Smallest body, just 3.5 mm 0.138 in thick

It can be mounted in a very small space as its size is just W10 × H14.5 × D3.5 mm
W0.394 × H0.571 × D0.138 in
 (thru-beam, front sensing type).

Flexible mounting

The diffuse reflective type sensor is front sensing and is so thin that it gives an impression of being just pasted on the mounting base. The thru-beam type is available as front sensing type, as well as, side sensing type, allowing flexible mounting.

A wide variety of narrow-beam type! Light diffusion is approx. 1/2 of standard type.

EX-□S□

Less interference with no slit, narrow-pitch can be set.

The pitch of installation is 1/2 of conventional models, so that the close-installation is possible. No cost is necessary to purchase or install a slit.

Possible to sense a minute object less than $\varnothing 0.5$ mm $\varnothing 0.039$ in with no slit.

The series is applicable to sense a minute object without any cost.

Long sensing range of 1 m 3.281 ft with narrow beam

A long 1 m 3.281 ft sensing range is possible with narrow beam.

APPLICATIONS**Positioning of PCBs****Detecting ICs****Detecting PCB rack****Detecting wafer cassette****Detecting thin ring****Checking for absence of capacitor in tray****BASIC PERFORMANCE****Electric power saving ***

The EX-10 series achieves reductions in power consumption of up to 65 %. These sensors contribute to environmental friendliness.

* Effective from production in October 2010.

**High-speed response time: 0.5 ms**

The sensor is suitable for detecting small and high-speed traveling objects.

**Minimum sensing object: $\varnothing 1$ mm $\varnothing 0.039$ in EX-11(E)□, EX-15(E)□**

EX-11□, EX-11E□, EX-15 and EX-15E are incorporated with $\varnothing 1$ mm $\varnothing 0.039$ in slit masks so that $\varnothing 1$ mm $\varnothing 0.039$ in, or more, object can be detected. Hence, they are suitable for precise positioning or small parts detection.

**Long sensing range: 1 m 3.281 ft EX-19(E)□**

A sensing range of 1 m 3.281 ft has been realized with a slim size of just 3.5 mm 0.138 in. It can be used to detect even wide IC trays.

**Background suppression****Hardly affected by background**

Even a specular background separated by 100 mm 3.937 in, or more, is not detected. (However, the background should be directly opposite. A spherical or curved background may be detected.)

**Black object reliably detected**

It can reliably detect dark color objects since it is convergent reflective type.

ENVIRONMENTAL RESISTANCE

Incorporated an inverter countermeasure circuit *

The **EX-10** series become significantly stronger against inverter light and other extraneous light.

* Effective from production in October 2010.

Waterproof IP67

The sensor can be hosed down because of its IP67 construction and the non-corrosive stainless steel mounting bracket.

Note: However, take care that if it is exposed to water splashes during operation, it may detect a water drop itself.

Bending durability

EX-□-R

Flexible cable type **EX-□-R** is available. It is most suitable for moving parts, such as robot arm, etc.

MOUNTING / SIZE

Mountable with M3 screws

Non-corrosive stainless steel type sensor mounting bracket is also available.

- **MS-EX10-1**
[Cold rolled carbon steel (SPCC)]

MS-EX10-11
[Stainless steel (SUS304)]
(mounting bracket for the front sensing type)

- **MS-EX10-2**
[Cold rolled carbon steel (SPCC)]

MS-EX10-12
[Stainless steel (SUS304)]
(mounting bracket for the side sensing type)

- **MS-EX10-3**
[Cold rolled carbon steel (SPCC)]

MS-EX10-13
[Stainless steel (SUS304)]
(L-shaped mounting bracket)

Note: Sensor mounting brackets can not be used for the narrow beam type (**EX-□S□**).

Red beam makes beam alignment easy

The red LED beam projected from the emitter helps you to align the sensor heads.

FUNCTIONS

Bright 2-color indicator

A convenient 2-color indicator has been incorporated in the miniature body.

VARIETIES

Operation mode switch

EX-15□/17□

Thru-beam type sensor incorporated with an operation mode switch on the bifurcation is also available. It helps you to test the operability before start-up.

OTHERS

Less resources used *

Based on environmental considerations, simplified packaging is used in order to reduce waste. In addition, the bag is made from polyethylene which produces no toxic gases even when burned.

* Effective from production in

ORDER GUIDE

| Type | | Appearance | Sensing range | Model No.(Note 2) | | Output operation | Output | | |
|--|------------------|--|---|--|---|---|---|--|--------------------------|
| | | | | NPN output | PNP output | | | | |

|  500 mm 19.685 in | | | | | EX-13SEA EX-13SEB | EX-13SEA-PN EX-13SEB-PN | Light-ON Dark-ON | | |
| Side sensing | | | | |  | | | | |

NOTE: Mounting bracket is not supplied with the sensor. Please select from the range of optional sensor mounting brackets (MS-EX10-□). Sensor mounting brackets (MS-EX10-□) can not be used for the narrow beam type (EX-□S□).

Notes: 1) The sensor does not detect even a specular background if it is separated by 100 mm 3.937 in or more. (However, the background should be directly opposite. A spherical or curved background may be detected.)

2) The model No. with "P" shown on the label affixed to the thru-beam type sensor is the emitter, "D" shown on the label is the receiver.

Flexible cable type

Flexible cable type is also available for NPN output type. (excluding narrow beam type EX-□S□ and sensor with operation mode switch on the bifurcation EX-15□/17□)

When ordering this type, suffix "-R" to the model No.

(e.g.) Flexible cable type of EX-11A is "EX-11A-R".

5 m 16.404 ft cable length type

5 m 16.404 ft cable length type (standard: 2 m 6.562 ft) is also available for NPN output type. (excluding narrow beam type EX-□S□ and flexible cable type)

When ordering this type, suffix "-C5" to the model No.

(e.g.) 5 m 16.404 ft cable length type of EX-11A is "EX-11A-C5".

| Accessories | | | Mounting screws: 1 set | | | | | Mounting screws: 1 set | Mounting screws: 1 set, Adjusting screwdriver: 1 pc. | | | | | | |

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C **+73.4 °F**.

2) Model Nos. having the suffix "-PN" are PNP output type.

3) Either Light-ON or Dark-ON can be selected by the operation mode switch.

4) The sensing range and the hysteresis of convergent reflective type sensor are specified for white non-glossy paper (50 × 50 mm **1.969 × 1.969 in**) as the object.

5) The min. sensing objects are specified in case the emitter / receiver sensing range is to set the maximum.

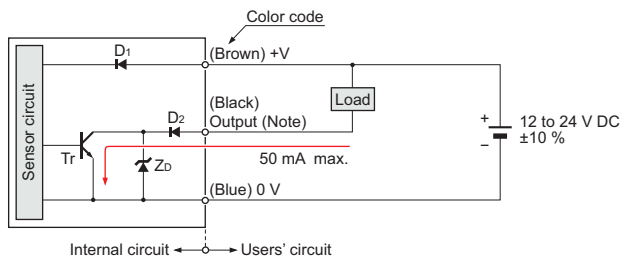

6) The flexible cable type (model Nos. having suffix "-R") has a 0.1 mm² 3-core (thru-beam type emitter: 2-core) flexible cabtyre cable, 2 m **6.562 ft** long.

SENSING CHARACTERISTICS (TYPICAL)**EX-11□ EX-11E□ EX-15□ EX-15E□ Thru-beam type****Parallel deviation****Angular deviation*****Optical properties of side sensing types (EX-□E□)**

Due to the optical properties of side sensing types, note that sensing may be affected if multiple sensors are positioned in such a way that optical axes intersect as shown in the diagram below.

Beam from Emitter 1 may be caught by Receiver 2.

There is no problem when sensors are installed in parallel (although the distance between sensors should be $t \times 2$ or more).

EX-13□ EX-13E□ EX-17□ EX-17E□ Thru-beam type**Parallel deviation****Angular deviation****Parallel deviation with slit masks (ø1.2 mm ø0.047 in)****Parallel deviation with slit masks (ø1.5 mm ø0.059 in)****EX-19□ Thru-beam type****Parallel deviation****Angular deviation****Parallel deviation with slit masks (ø1.2 mm ø0.047 in)****Parallel deviation with slit masks (ø1.5 mm ø0.059 in)****EX-19E□ Thru-beam type****Parallel deviation****EX-11S□/EX-11SE□ Thru-beam type****Parallel deviation****EX-13S□/EX-13SE□ Thru-beam type****Parallel deviation****EX-19S□ Thru-beam type****Parallel deviation**

SENSING CHARACTERISTICS (TYPICAL)

EX-14□

Convergent reflective type

Sensing fields

• Horizontal (left and right) direction

• Vertical (up and down) direction

Correlation between lightness and sensing range

The sensing region (typical) is represented by oblique lines in the left figure. However, the sensitivity should be set with enough margin because of slight variation in products.

(Lightness shown on the left may differ slightly from the actual object condition.)

Correlation between material (50 × 50 mm 1.969 × 1.969 in) and sensing range

The bars in the graph indicate the sensing range (typical) for the respective material. However, there is a slight variation in the sensing range depending on the product. Further, if there is a reflective object (conveyor, etc.) in the background of the sensing object, since it affects the sensing, separate it by more than twice the sensing range shown in the left graph.

PRECAUTIONS FOR PROPER USE

Refer to p.1458~ for general precautions.

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Mounting

• In case of mounting on tapped holes (Unit: mm in)

Side sensing

Front sensing

The tightening torque should be 0.2 N·m or less.

• In case of using attached screws and nuts (Unit: mm in)

Side sensing

Front sensing

The tightening torque should be 0.2 N·m or less.

Operation mode switch (EX-15□, EX-15E□, EX-17□ and EX-17E□ only)

| Switch position | Description |
|-----------------|--|
| | Light-ON mode is set when the switch is turned fully clockwise (L side). |
| | Dark-ON mode is set when the switch is turned fully counterclockwise (D side). |

Others

- Do not use during the initial transient time (50 ms) (EX-15□, EX-15E□, EX-17□, EX-17E□: 100 ms) after the power supply is switched on.
- Excess bending of the cable or stress applied to the cable may disconnect the internal lead wire.
